

ABSTRACT OF THE DISCLOSURE

The film forming apparatus comprises: a turntable 1
which rotates an optical disc substrate 3; and a film
5 forming liquid supplying device 2 which supplies an
ultraviolet curing resin 4 onto the optical disc substrate
3. While the optical disc substrate 3 is rotated by the
turntable 1, the ultraviolet curing resin 4 is supplied
onto the optical disc substrate 3 by the film forming
10 liquid supplying device 2.
